UNDERSTANDING YOUR HEALTH RECORD

A record is made each time you visit a hospital, physician, or other health care provider. Your symptoms, examination and test results, diagnoses, treatment, and a plan for future care are recorded. This information is most often referred to as your "health or medical record," and serves as a basis for planning your care and treatment. It also serves as a means of communication among any and all other health professional who may contribute to your care. Understanding what information is retained in your record and how that information may be used will help you to ensure its accuracy, and enable you to relate to who, what, when, where, and why others may be allowed access to your health information. This effort is being made to assist you in making informed decisions before authorizing the disclosure of your medical information to others. Use or disclosure of your health information will follow the more stringent of State or Federal laws.

UNDERSTANDING YOUR HEALTH INFORMATION RIGHTS
